

SAFETY IS OUR PRIORITY.

Contractors working for Nebraska Public Power District are in the area delivering materials and performing construction activities associated with building a new 345,000-volt transmission line. Expect more trucks and equipment on local roads, specifically along Highway 83. **For your safety and theirs**, please slow down, stay alert, and give crews plenty of room to work.

KEY SAFETY TIPS AROUND WORK AREAS:

SLOW DOWN: Reduce your speed when approaching work areas or when following equipment.

RESPECT THE WORK ZONE: Do not approach or attempt to talk to crews while they are working.

STAY ALERT: Watch for workers who may be hidden, as well as equipment entering or leaving the work area.
