

# Route Selection Process

**Opportunity** - A location for siting a transmission line that has minimal impacts.

**Constraint** - Areas that may be more sensitive to impacts when siting transmission lines.

**Corridor** - A strip of land to be evaluated for possible transmission routes.

**Route** - Centerline of a proposed transmission line between two points.

## Examples of Sensitive Areas

- Agricultural concerns and development
- Airports
- Residential areas
- Environmental areas
- Cultural and historic resources
- Agricultural concerns and development

## Examples of Routing Criteria

- Proximity to residences
- Irrigation impacts
- Use of field lines, property lines, section or half-section lines
