R-Project 345,000 Volt

Transmission Line PROJECT

NPPD Begins R-Project Field Work

Nebraska Public Power District (NPPD) is performing field work for its R-Project transmission line. These activities include:

- Right-of-way acquisition
- Relocation of pre-existing electrical distribution lines
- Relocation of pre-existing water and irrigation wells
- Staking the transmission line route and access areas
- Development of material and fly yards, and procurement, assembly and storage of materials in those fly yards
- Procurement and storage of stormwater pollution prevention plan materials
- Construction and/or maintenance of gates, fencing and access materials
- Tree and brush clearing
- All substation work and construction.

“We have quite a laundry list of activities to complete,” said Senior Project Manager **Paul Brune**. “We will continue to work on these items and more through the winter.”

The public will see more activity around the area of the transmission line route as the construction contractor—Forbes Bros. Timberline Construction, Inc.—begins establishing its local presence, commented Brune.

“Forbes personnel and their subcontractors will be in the local communities more and on rural roads,” he said.

With all of the activities taking place, drivers in the area of the transmission line route will see more heavy trucks on the roads and are reminded to be safe and prepare for slower traffic. (See safety ad on back.)

The R-Project transmission line project is expected to be in service approximately two years after the construction begins.

More information on the R-Project can be found on NPPD’s website at rproject.nppd.com.

Right-of-way questions?

Please call **Richard Bunkers** at

308-660-1836 or stop by

39315 Highway 2 in **Theadford**.

Other project questions can be addressed through NPPD’s R-project toll-free number,

1-888-677-3412.

Be sure to

DRIVE SAFELY

Nebraska Public Power District is delivering materials associated with construction of a 345,000 volt transmission line from NPPD's Gerald Gentleman Station near Sutherland to NPPD's existing substation east of Thedford. The new line will then proceed east and connect to a second substation to be sited in Holt County. Be on the lookout for utility vehicles and semi-loads of materials traveling the roads in these areas.

Your safety is important.
